

Certificate of *ROHS* Conformance

The listed component(s) comply with the following directive:

- a) A maximum concentration value of 0.1% by weight in homogenous materials for lead
- b) A maximum concentration value of 0.1% by weight in homogenous materials for hexavalent chromium
- c) A maximum concentration value of 0.1% by weight in homogenous materials for mercury
- d) A maximum concentration value of 0.1% by weight in homogenous materials for polybrominated biphenyls
- e) A maximum concentration value of 0.1% by weight in homogenous materials for polybrominated diphenyl ethers
- f) A maximum concentration value of 0.01% by weight in homogenous materials for cadmium

This is certification that these components are within this directive:

	Part Description	Effective Date:
CE9 Series	Cermet Trimmer Potentiometer	February 2005
